ICAIN-2026
International Conference on Artificial Intelligence and Networking

26th -28th November 2026
Organized by
Universal Inovator & UI-Educon
In association with
Indian Institute of Information Technology, Allahabad

********** CALL FOR PAPERS **********

SPECIAL SESSION ON

Explainable and Generative Quantum AI for Data-Driven Decision Science: Applications in Healthcare, FinTech, and Smart Systems

SESSION ORGANIZERS:

Prof. Naren. J., MS Ramaiah University of Applied Sciences, Bangalore, India.

narenj.cs.et@msruas.ac.in

Dr. A. Abdul Rasheed., MS Ramaiah University of Applied Sciences, Bangalore, India.

abdulrasheed.cs.et@msruas.ac.in

Dr. Ashokkumar. S.R., MS Ramaiah University of Applied Sciences, Bangalore, India.

ashokkumarsr.ca.et@msruas.ac.in

SESSION DESCRIPTION:

The combination of Quantum Computing, Artificial Intelligence, and Data Science is changing how we make decisions today. Quantum AI can greatly improve computing efficiency and help analyze complex, high-dimensional datasets. At the same time, Generative AI models are changing how we create synthetic data and build predictive models. Many advanced AI models, however, act like black boxes. This makes it hard to use them

in important areas like healthcare and financial services. Explainable AI (XAI) is crucial for ensuring transparency, understanding, and trust in automated decision systems. This special session seeks to gather researchers and practitioners who work on Explainable AI, Generative AI, and Quantum Machine Learning. The goal is to explore how these fields can come together for data-driven decision-making. The focus will be on new methods, frameworks, and real-world uses in Healthcare, FinTech, and Smart Systems. The session will offer a space to discuss new algorithms, hybrid models, theoretical advancements, and practical applications that link quantum computing with modern AI techniques.

RECOMMENDED TOPICS:

The special session invites original research contributions including but not limited to the following topics:

Quantum AI and Quantum Machine Learning

1. Quantum neural networks
2. Variational quantum circuits
3. Quantum optimization for decision science
4. Hybrid quantum-classical machine learning models

Explainable Artificial Intelligence

1. Interpretable quantum machine learning models
2. Explainability techniques for deep learning
3. Trustworthy AI frameworks
4. Model transparency and fairness in decision systems

Generative AI

1. Generative adversarial networks (GANs)
2. Variational autoencoders
3. Diffusion models
4. Synthetic data generation

Data-Driven Decision Science

1. Decision support systems

2. Predictive analytics
3. Data-driven optimization models

Application Domains

1. Healthcare diagnostics and disease prediction
2. Financial fraud detection and risk assessment
3. Smart cities and smart infrastructure
4. Energy systems and intelligent grids
5. Cybersecurity and anomaly detection

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on **Explainable and Generative Quantum AI for Data-Driven Decision Science: Applications in Healthcare, FinTech, and Smart Systems** ***on or before*** **[30th August 2026]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at https://www.icain-conf.com/downloads. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify "**Explainable and Generative Quantum AI for Data-Driven Decision Science: Applications in Healthcare, FinTech, and Smart Systems**" [Session Name] at the top (above paper title) of the first page of your paper.
