ICAIN-2026
International Conference on Artificial Intelligence and Networking

26th -28th November 2026
Organized by
Universal Inovator & UI-Educon
In association with
Indian Institute of Information Technology, Allahabad

********** CALL FOR PAPERS **********

SPECIAL SESSION ON

AI-Driven Computer Vision and Edge Intelligence for Secure Cyber-Physical Systems and Industrial IoT

SESSION ORGANIZERS:

1. Dr. Hashmat Fida, Presidency University, Bengaluru

2. Dr. Sabyasachi Bhattacharyya, Assam Engineering College, Guwahati & Department of Electronics and Telecommunication Engineering, Barak Valley Engineering College, Sribhumi, Govt. of Assam

EDITORIAL BOARD: (Optional)

Dr. Radziah Binti Mohamad
Universiti Teknologi Malaysia (UTM), Malaysia
Email: radziahm@utm.my

SESSION DESCRIPTION:

The rapid convergence of Artificial Intelligence, computer vision, and advanced networking technologies is fundamentally transforming the landscape of Cyber-Physical Systems (CPS) and Industrial Internet of Things (IIoT). As physical infrastructure becomes increasingly intertwined with intelligent digital systems, there is a growing demand for robust, real-time, and secure AI-driven solutions capable of operating under the strict latency, bandwidth, and reliability constraints of industrial and mission-critical environments.

This special session provides a dedicated forum for researchers, engineers, and practitioners to present and discuss cutting-edge advances at the intersection of AI, computer vision, edge computing, and secure networked CPS. The session aims to bridge the gap between theoretical AI/ML developments and their practical deployment in cyber-physical environments, addressing both the opportunities and the open

challenges that arise when intelligent perception and decision-making are embedded directly into networked physical systems.

RECOMMENDED TOPICS:

1. **Computer Vision for Industrial and CPS Environments**
2. **Edge AI and On-Device Inference for IoT Nodes**
3. **Federated and Distributed Learning in Networked CPS**
4. **AI-Enhanced Communication Protocols for IIoT (5G/6G, TSN, MQTT)**
5. **Cybersecurity and Adversarial Robustness in CPS**
6. **Intrusion and Anomaly Detection in IIoT Networks**
7. **Digital Twin Technologies and Real-Time Sensor Fusion**
8. **Predictive Maintenance and AI-Driven Process Optimization**
9. **Software-Defined Networking (SDN) for CPS Infrastructure**
10. **Smart Infrastructure Applications (Transportation, Smart Grid, Agriculture, Manufacturing)**

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on **AI-Driven Computer Vision and Edge Intelligence for Secure Cyber-Physical Systems and Industrial IoT** ***on or before*** **30th Aug 2026**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at https://www.icain-conf.com/downloads. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify [Session Name] at the top (above paper title) of the first page of your paper.
