

ICAIN-2026
International Conference on Artificial
Intelligence and Networking

26th -28th November 2026
Organized by
Universal Inovator & UI-Educon
In association with
Indian Institute of Information Technology, Allahabad

******* CALL FOR PAPERS *******

SPECIAL SESSION ON

Green AI and Sustainable Computing in Next-Generation Networks

SESSION ORGANIZERS-1:

Dr. Neeraj Chugh, Associate Professor, Program Lead (Cloud Computing and Virtualization Technology), School of Computer Science, UPES, Dehradun, Uttarakhand, India

Official email: nchugh@ddn.upes.ac.in

Personal email: neermit75@gmail.com

Experienced academician and administrator with over 24 years of experience in higher education, Dr. Neeraj Chugh currently serves as an Associate Professor at the School of Computer Science, UPES Dehradun, India, with the additional responsibility of Program Lead for the Cloud Computing and Virtualization Program. Holding a Ph.D. in Computer Science & Engineering, Dr. Chugh has demonstrated strong leadership in academic administration, curriculum development, faculty mentoring, accreditation processes, and industry-academia collaborations. His research interests include Artificial Intelligence, Machine Learning, IoT, and Technical Debt, with several publications in Scopus/SCI-indexed journals and international book chapters to his credit. He has also published multiple patents in emerging technology domains and actively contributes to academic excellence as a reviewer, session chair, and mentor for postgraduate students. Dr. Chugh has been actively involved in NEP-aligned curriculum reforms, NAAC audits, LMS integration, and student innovation initiatives. A life member of Computer Society of India and International Association of Engineers, he remains committed to fostering academic growth through research, digital pedagogy, and institutional development.

SESSION ORGANIZERS-2:

Dr. Deepika Koundal, Senior Researcher at the University of Eastern Finland, Adjunct Researcher at Ho Chi Minh City Open University in Vietnam, and a Senior Associate Professor (Sabbatical) at UPES, Dehradun, India.

Official email: dkoundal@uef.fi

Dr. Deepika Koundal currently serves as a Senior Researcher at the University of Eastern Finland, an Adjunct Researcher at Ho Chi Minh City Open University in Vietnam, and a Senior Associate Professor (Sabbatical) at UPES, Dehradun, India. She is having a rich academic experience, specializing in artificial intelligence, computer vision, image processing, and deep learning. She holds a B.Tech, M.Tech, and Ph.D. in Computer Science and Engineering and has received several prestigious accolades, including the MSCA Seal of Excellence from the European Commission. Recognized as a top 2% researcher by Stanford University in 2023 and 2024. She has earned multiple research excellence awards from UPES and Chitkara University and has published numerous research articles, edited notable books, and holds several patents. Additionally, she contributes as a guest and associate editor for leading journals, including IEEE and Elsevier.

SESSION ORGANIZERS-3:

Dr. Chandra Mani Sharma, Assistant Dean(Academics), School of Computer Science, UPES, Dehradun, Uttarakhand, India

Official email: cmsharma@ddn.upes.ac.in

Chandra Mani Sharma has more than a decade of experience in academia, research, and industry. He is currently working as Assistant Dean (Academics) at UPES, Dehradun. His areas of interest include multimodal mental healthcare informatics, explainable AI, reinforcement learning, and agentic AI. He has published more than 50 research papers, books, and articles with reputed publishers.

SESSION DESCRIPTION:

With the massive energy consumption of large language models and global data centers, "Green AI" is no longer optional. This session focuses on the intersection of environmental sustainability and intelligent networking. We invite research on "Lightweight AI" that can run on low-power devices and networking protocols designed to minimize the carbon footprint of data transmission without sacrificing performance.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

1. Energy-efficient Model Compression (Pruning, Quantization) for IoT.
2. Carbon-aware routing protocols in Wide Area Networks (WAN).
3. Sustainable hardware-software co-design for AI acceleration.
4. AI for optimizing renewable energy use in smart grids and data centers.
5. Life Cycle Assessment (LCA) of AI-driven networking equipment.
6. Hybrid AI Models for Renewable Energy Resource Allocation in Smart Computing Environments.
7. Explainable AI for Decision Support in Renewable Energy Management Systems

8. Agentic AI for Autonomous Energy Control in Smart Data Centers and Intelligent Power Systems
9. AI-Driven Energy Management for Sustainable Smart Grids and Green Data Centers
10. Intelligent AI Frameworks for Energy-Efficient Data Centers

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on **[session name] on or before [30th August 2026]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <https://www.icain-conf.com/downloads>. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify [Session Name] at the top (above paper title) of the first page of your paper.
