

ICAIN-2026
International Conference on Artificial
Intelligence and Networking

26th -28th November 2026
Organized by
Universal Inovator & UI-Educon
In association with
Indian Institute of Information Technology, Allahabad

******* CALL FOR PAPERS *******

SPECIAL SESSION ON

Agentic AI and Multi-Agent Systems for Intelligent Computing and Networking

SESSION ORGANIZERS:

Dr. Lokesh Jain, Associate Professor, School of Engineering and Technology, Vivekananda Institute of Professional Studies - Technical Campus (VIPS-TC), Delhi, India
Email: nsitlokesh.jain@gmail.com

EDITORIAL BOARD: (Optional)

NA

SESSION DESCRIPTION:

The Special Session on Agentic AI and Multi-Agent Systems for Intelligent Computing and Networking aims to bring together researchers, practitioners, and industry experts to explore the latest advances in autonomous AI agents, collaborative multi-agent systems, and their applications in intelligent computing and next-generation networking. Recent developments in large language models (LLMs), foundation models, reinforcement learning, and distributed AI have enabled intelligent agents to perceive, reason, plan, communicate, and act autonomously in dynamic environments. These capabilities are transforming diverse domains, including network automation, cybersecurity, cloud-edge computing, Internet of Things (IoT), smart cities, healthcare, robotics, and autonomous systems. This special session welcomes original research on the design, coordination, security, scalability, and evaluation of agentic and multi-agent systems, as well as their integration with emerging networking technologies such as 5G/6G, software-defined networking (SDN), network function virtualization (NFV), and edge intelligence. The session seeks to foster interdisciplinary collaboration and promote innovative solutions that advance intelligent, secure, scalable, and trustworthy computing and networking systems.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Agentic AI Architectures and Autonomous Intelligent Agents
- Multi-Agent Systems and Collaborative Intelligence
- Large Language Model (LLM)-Powered AI Agents
- Multi-Agent Reinforcement Learning (MARL)
- Planning, Reasoning, and Decision-Making in Agentic AI
- Human-Agent Collaboration and Human-in-the-Loop AI
- Distributed AI and Edge Intelligence
- Agentic AI for Cloud, Edge, and Fog Computing
- AI-Driven Network Automation and Orchestration
- Agentic AI for Software-Defined Networking (SDN), Network Function Virtualization (NFV), and 5G/6G Networks
- Intelligent Agents for Internet of Things (IoT), Cyber-Physical Systems, and Smart Cities
- AI Agents for Cybersecurity, Threat Detection, and Autonomous Incident Response
- Trustworthy, Explainable, Secure, and Privacy-Preserving Agentic AI
- Knowledge Graphs, Retrieval-Augmented Generation (RAG), and Tool-Using AI Agents

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on [Agentic AI and Multi-Agent Systems for Intelligent Computing and Networking] **on or before [30th August 2026]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <https://www.icain-conf.com/downloads>. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify [Session Name] at the top (above paper title) of the first page of your paper.
