

ICAIN-2026
International Conference on Artificial
Intelligence and Networking

26th -28th November 2026
Organized by
Universal Inovator & UI-Educon
In association with
Indian Institute of Information Technology, Allahabad

******* CALL FOR PAPERS *******

SPECIAL SESSION ON

Explainable Artificial Intelligence in Electronic Health Records, Genetics, and Medical Imaging
(XAI-EHR-Genetics-MI)

SESSION ORGANIZERS:

Dr Pankaj Kumar Jain

Assistant Professor

School of Artificial Intelligence, Sai University,
Chennai India

Pankaj.j@saiuniversity.edu.in

google.com/view/pankajkjain/home

ORCID: 0000-0002-4600-8513

EDITORIAL BOARD: (Optional)

Editorial Board Member of Springer Nature Journal,
BMC Medical Informatics and Decision Making

Associate Editor Benthem Science Journal

The Open Neuroimaging Journal

SESSION DESCRIPTION:

Artificial Intelligence has become central to modern healthcare systems, particularly in domains such as Electronic Health Records (EHR), genomics, and medical imaging. Despite remarkable predictive capabilities, many AI models lack interpretability, which restricts their deployment in critical clinical environments where transparency and accountability are essential.

This special session focuses on Explainable Artificial Intelligence (XAI) methods that enable clinicians and researchers to understand, trust, and effectively utilize AI-driven decisions. The session aims to explore techniques that provide meaningful explanations for predictions derived from heterogeneous healthcare data sources, including structured EHR data, high-dimensional genetic information, and complex imaging modalities.

The goal is to bridge the gap between high-performance AI systems and their practical adoption in healthcare by addressing interpretability, fairness, and ethical considerations. Contributions are invited that propose novel models, frameworks, and real-world applications of explainable AI in healthcare, with particular emphasis on multi-modal integration and clinically relevant insights.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Explainable AI methods for Electronic Health Records (EHR) analysis
- Interpretable machine learning models in genomics and precision medicine
- Explainability techniques for deep learning in medical imaging
- Multi-modal learning integrating EHR, genetic, and imaging data
- Trustworthy and transparent AI systems in healthcare
- Bias detection and fairness in healthcare datasets
- Human-centered AI and clinical decision support systems
- Visualization techniques for interpretable healthcare AI
- Ethical and regulatory challenges in explainable healthcare AI

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on **Explainable Artificial Intelligence in Electronic Health Records, Genetics, and Medical Imaging *on or before* [30th August 2026]**. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <https://www.icain-conf.com/downloads>. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify [Session Name] at the top (above paper title) of the first page of your paper.
