SESSION DESCRIPTION:

The conference covers a diverse set of research in cross-disciplinary themes. Its applications range from computer vision, image processing, artificial intelligence, and machine learning to Data Science and Big Data analytics. The text provides an in-depth, multidisciplinary discussion of recent advancements and state-of-the-art methods in disciplines. The publication is ideally designed for academicians, technology professionals, students, and researchers interested in uncovering the latest innovations in these fields. It also features explanatory, illustrations of Algorithms, architecture, applications, software systems, and data analytics in the scope of a specified domain.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

- Deep Learning towards smart computing systems
- Artificial intelligence technologies like machine learning in Health care.
- Data Science and its application business.
- Federated learning for AI-powered IoT systems
- Artificial intelligence technologies like Deep Learning in Agriculture.
- AI-enabled monitoring systems
- AI-enabled medical Imaging

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this particular theme session on “Recent Advancements in Artificial Intelligence” *on or before* [30th August 2026]. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE’S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <https://www.icain-conf.com/downloads>. All submitted papers will be reviewed on a double-blind, peer-review basis.

NOTE: While submitting a paper in this special session, please specify “**Recent Advancements in Artificial Intelligence**” at the top (above paper title) of the first page of your paper.
